

# 48<sup>th</sup> Paris International Paris Tournament

April 3 – 5 2021 on OGS

## How to use OGS during the tournament

All tournament games **must** be played on OGS inside the tournament group. Otherwise the tournament organisation will have serious difficulties to follow your games. There are some rules of how to set up the games that are shown below. Also for fair play controls these rules must be followed, otherwise referees might decide to forfeit your game(s).

If everything works well your game links and game results will be uploaded automatically to the tournament's website ([Parings and Results](#) tab).

(If your are playing for the first time on OGS please check out the server well before the tournament starts. The OGS interface is accessed via your internet browser. There is no need to install a client.)

- 1) First join the tournament group on OGS:

<https://online-go.com/group/8359>

and click on

[Join Group](#)

(Please do not *Create a tournament* inside this group.)

- 2) You will see a few announcements concerning the tournament and the list of games currently played in this group. Below you have the possibility to chat with organisers and other players. For chatting and joining referees you can also use Discord or the form on the website.

On the right side pane you have the list of OGS members of this group.
